Release Button (both sides)　　Alignment Guides　　Tool body

2

1. Align the die module as shown in the picture below
2. Depress the buttons on both sides while attaching the module
3. Check that the module is securely attached

✔ OK　　✘ NG

⚠ Be careful not to touch the sharp cutting edges! Keep fingers clear from the tool die while terminating the cable!

A B

3

1. Dress the cable pairs using the 568A or 568B wiring standard
2. Insert the keystone jack and cable into the crimp tool
3. Firmly squeeze the tool handles to cut and terminate the cable
4. Release the crimp tool handles and remove the cable
5. Snap the cap onto the keystone jack
6. Remove the die module and engage the locking clip before storing
